Subject: Neshaminy Greenway Citizens Advisory Design Committee (CADC)
Date: Tuesday, December 15, 2020 3:03:33 PM

Dear Residents, I hope this finds you all well.

In an ongoing spirit of transparency and collaboration, we have elected to form a Citizens Advisory Design Committee (CADC) as part of our ongoing design efforts.

The purpose of the CADC will be to provide an avenue for the Townships as well as resident representatives to be a part of the design process, specifically for the NGT Phase 2, trail segments. Our intention is to include members of the CADC in meetings with our design engineer, Michael Baker Inc. to provide education on the design and permitting process, discuss concerns, and reach consensus on design issues as they pertain to the environmental context of the Neshaminy Creek Corridor.

This CADC will be made up of a representative from each of the Environmental Advisory Committees (EACs) of Doylestown and Buckingham Townships as well as a representative from the Warwick Tree Committee as they do not have an EAC.

Invitations to each municipality have been sent.

In addition to these Township representatives we are extending an invitation to Joyce Ely, the president of the Neshaminy Creek Watershed Association as well as Meghan Rogalus, the Watershed Specialist from the Conservation District.

To round out our committee we would like to invite **Jim Walter** and **Marie Carota** to represent the residents along Pebble Hill Road on this committee given their recent appearance, and presentation before the Doylestown EAC.

We anticipate the first meeting of the committee to occur, virtually, in early February. (Might be earlier depending on Township responses)

This committee is not to be in lieu of any other public meetings we may have but rather a targeted focus group to represent all concerned.

The minutes and materials presented in this committee will be made available, to all, on the project portal: <https://trails-bucksgis.opendata.arcgis.com/pages/ngt2-dark-hollow>

The county remains committed to pursuing the design of the trail in accordance with the grants we have received, and recognizes the opportunity for broader conversation around the welfare of the Neshaminy Creek Corridor.

Stay healthy
